

1. Name: Powell Gammill
Educational Background: NAU grad
Professional Background: editor-FreedomsPhoenix.com, molecular biologist, lab manager

2. If elected, what would be your top 3 priorities as a legislator?
 - i. Pay off the national debt as best we can. Starting with an auction of all federal government property. Terminating federal employees, contracts and grants.

 - ii. Immediate and complete withdrawal of all our troops and their equipment not only from Iraq, but from around the globe. Thank them and send them home to their families and jobs.

 - iii. Impeach the President, Vice President, cabinet members and if convicted, jail them separately in a Supermax dungeon without charge, *incommunicado* without access to lawyers until they can be rendered to Iraq to face an Iraqi court room.

3. Over the past five years, the undergraduate, resident tuition at ASU, NAU, and UA has increased at an average annual rate of 13.5%, 12.8%, and 13.8%, respectively. The graduate, resident tuition has increased at a similar rate. Please comment.

As long as easily acquired federally guaranteed student loans are available to you, and the maximum amount you can annually receive keeps increasing, there will be no economic market force that prevents the Regents from increasing your tuition. You will be many tens of thousands of dollars in debt. And like government debt, little chance of paying them off. Get rid of the loans, and tuition will eventually fall to its lowest possible rate.

4. The Project on Student Debt recently reported that the 2005 graduates from Arizona's public universities graduated with an average debt level of \$16,564. This is the 23rd highest average debt level among the 50 states for 2005 graduates of public 4-year universities. Please comment.

Suckers! Hope you majored in something that pays and you excelled, or it will be a harsh world out there. Especially when the economy collapses.

5. The Annual Financial Aid Report produced by the Arizona Board of Regents found that of all the financial aid, including all scholarships, grants, and loans from federal, private, school, family, and state sources, provided to students, 8.8% was funded from federal scholarships and grants, 0.6% was funded from federal work study, and 46.5% was funded from loans taken out by students. Please comment.

Is it fair to call future serfs suckers a second time? Get ready to work slaves. Hope you didn't have dreams of a nice home, a nice car. Heck, we are counting on you to pay for our Social Security and Healthcare. Your student debt is nothing. Wait until you receive the bill for the national debt we left you to pay (\$46,400,000,000,000 – US Comptroller).

6. In 100 words or less, please detail why students of Arizona's public universities should vote for you?

You should not be voting for anyone or anything. Not only is voting a scam, it is immoral (see: [Voting at GammillForCongress.com](http://VotingatGammillForCongress.com)).

But if you just cannot fight the compulsion programmed into you by your public indoctrination then remember NOT ONE libertarian is responsible for the predicament you and our nation finds itself in. Decades of the Republicans and Democrats are. And you won't get changes by voting for the same old thing.

You own yourself, no one else does. And you own ALL that you produce to do with as YOU will. Freedom's the answer. What's the question?
