current position = Molecular Biologist, Laboratory Manager

and past political experience. = none

Here are our questions:

1. What federal strategies would you develop to ensure the security of Arizonans?

1. Pull our troops back to the States from the more than 130 countries they are currently deployed, returning them to a defensive force. 2. No foreign aid. 3. Stop interfering in other nation's affairs. 4. Stop interfering in our nation's international business affairs. 5. Marque and Reprisal for terrorists.

2. The U.S. provides foreign aid throughout the world, including many Middle Eastern countries. Do you support foreign aid, and if so, for what purposes?

Taxation is theft by the politicians for redistribution to others for political gain (vote buying, and political contributions) . I can imagine no worse theft than to be handing the stolen booty to another country or foreigners so favored by Washington. D.C. No foreign aid to anyone, for any reason.

-- 50 words --

3. The Bush administration has discounted Yasser Arafat as a viable partner in the Middle East peace process. What role should the U.S. play in the process, and what relationship should the U.S. have with Israel to help achieve peace in the region?

1. Stop interfering. Let Israelis and Palestinians (as well as other Middle East countries) work it out amongst themselves. 2. Repeal laws that prohibit citizens from donating their services or any amounts of money to any foreign nations, groups or causes with whom we are not in a declared war.
